

Portable UCI Hardness Tester for metals

The QH5U hardness testers are ideal to measure metal plates or sheets, tubes or pipes with small thicknesses, small parts in general, heat affected zones (HAZ) in welds as well as heat treated or hardened surfaces among other applications generating an almost invisible indentation.

Ideal to measure and control of...

Metal sheets, pipes and small parts HAZ or heat affected zones in welds

Crankshafts, Camshafts, Gears Superficial treatments

UCI Probes

	10	Ν	
(2)

10 N UCI Probe

Ideal to measure superficial hardness, polished surfaces and small parts with a good finish.

50 N UCI probe

Measure induction or cemented treated parts such as crankshafts, gears, welds and heat affected zones.

98 N UCI probe

Recommended for use in founded parts, weld seams and heat affected zones even in unmachined surfaces.

It's our acquisition software for PC that allows to receive, process and export the data stored in our equipment with datalogger.

DataCenter is available for download from our website at no additional cost.

Ready to use

Delivered in a high impact carrying case, inside you will find:

- **1** QH5 U electronic unit
- 2 UCI probe
- 3 HV Reference test block
- **4** Coupling paste for parts

- **5** Pendrive with dmq DataCenter software
- **6** Cable USB para conexión a PC
- Printed user manual
- **B** Certificate of conformity
